

## **ENVIRONMENTAL POLICY**

**Corrosion Resistant Products Ltd. is committed to the preservation of the environment and to working in a responsible way that protects the environment for our employees, their families, and others affected by our activities within the wider local and global communities within which the business operates.**

1. Management of environmental issues falls within the social category of sustainable development and is of equal importance to the economic success of the business.
2. Our goal is to understand our organization's impact on the local and global environment and hence to implement controls and other actions to prevent environmental damage and adverse impacts which may affect our not only our own community but also the wider national and international community
3. We recognise that the prevention of pollution -land, water, air – is of critical importance to the preservation of the environment and undertake to control wastes produced by our activities to either eliminate, prevent or minimize all pollution associated with our business operations.
4. We recognize that Climate change is occurring as a scientific fact and the role of human activities and associated Carbon emissions in driving the changes. We undertake to monitor and manage all Carbon emissions associated with our activities and develop and implement a strategy which will achieve net zero Carbon emissions from the business.
5. We recognize the significant role of Energy consumption in driving both Carbon emissions from, and costs to the organization. We undertake to measure and monitor energy use by the business and identify and implement Carbon neutral and cost-effective sources of energy for the business.
6. We undertake to preserve resources and minimize resource extraction and the adverse impacts to natural environments and habitats associated with it, and the impacts of waste disposal by actively seeking to categorize, re-use, repurpose or recycle materials and resources wherever and whenever possible.
7. We require all directors and managers to demonstrate leadership in environmental matters and to develop and maintain a positive culture within the organization which.
8. All employees of the organization have roles and responsibilities to maintain and follow environmental controls and procedures, and to report any concerns they may have, or unsafe conditions which may lead to environmental accidents or incidents that they may identify.
9. We will comply fully with all environmental legislation, regulations, codes of practice and other requirements relevant to the business and its

operations. We will develop and implement systems to ensure our Compliance with Legislation is known and maintained.

10. We will identify environmental hazards within the organization and its activities and take action to eliminate, reduce, or mitigate these hazards and the associated risks.
11. We will implement and maintain an Environmental Management System to help deliver these policy commitments. The system is based on the recognised standard for Environmental Management Systems: ISO14001
12. We will provide the necessary resources in personnel, finance, and time to implement and maintain the Environmental Management System.
13. This policy provides a framework assisting us in setting environmental Objectives and targets annually, which reflect our commitment to continual improvement in our environmental performance and to the improvement of the Environmental Management System itself.
14. We will provide relevant environmental information, training, and instruction for our employees to ensure their safety at work and assist in achieving our Environmental Objectives

S. Davies, Managing Director
